MADE IN INDIA

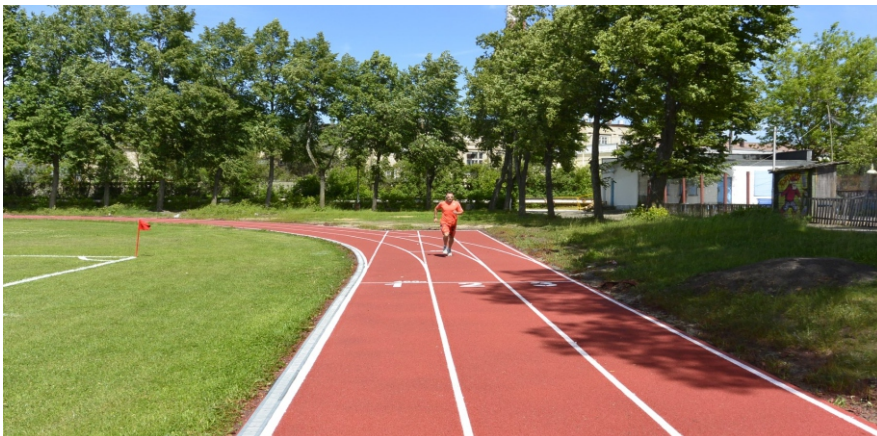

MOLDO " ECCOFAST " JOGGING/ RUNNING TRACK FFLOORING

Athletics tracks host several disciplines during both training and competition. ECCOFAST track and field surfaces offer uniform dynamic response and complete control over stride, rhythm, and balance for every athlete, professionals, and amateurs alike.

The advantages of our prefabricated track surfaces include optimal performance for athletes regardless of climate and environmental conditions. Moreover, their ease to repair makes them an incomparable choice. ECCOFAST operates a careful selection of raw materials for its running track surfaces and a constant production monitoring. We designs and produces running track surfaces for the best possible training and competition results.

We offers the entire range of athletic tracks including the full PUR, the sandwich and the spray system. Our customers can also purchase wetpour epdm and acrylic running paths from us.

Our tracks are made in INDIA as quality is highly important for such an area where athletes will be running at full speed on the surface. We also offer a turnkey solution including the sub base as well to provide the customer with a quality vertically integrated solution. The product was created for professional running with spike resistance, high quality grip for consistent acceleration and all weather usage. Perfect for those who want the highest quality running options in the market place

KEY FEATURES

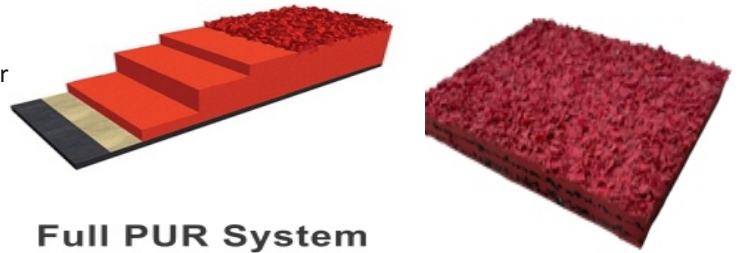

- Complete" MADE IN INDIA" products as per world Standards
