About HPU - 500 water based hybride PU Coating

The newly developed Water based Hybrid PU Coating can be formulated to waterborne dispersion system without any solvent addition during manufacturing and application, which has benefit of easy application and high performance /cost ratio. This new product not only provides the desired mechanical properties for sports floor coating but also offers excellent weatherability in the final formulated product with unique hybrid technique. These sports coatings provides high performance with low VOC, which meets increasing needs for eco-friendly requirement and strict standards.

Feature and Benefits

Outstanding Impact Resistance

Meeting the requirements of professional flooring test standards, 1000g steel ball, 100cm height, no cracks or peeling on the coating film

High Aberration Resistance

MOLDO HPU-500 Water based Hybrid PU protective coating system have higher Aberration Resistance, which meets and even exceeds professional flooring test standards even under critical conditions .

Excellent Chemical Resistance

Water resistance (168h)

Chemical resistance

Oil resistance
(120# petrol 168h)

No blisters

Alkali resistance
(20% NaOH, 168h)

No peeling

Acid resistance
(10% H₂SO₄, 168 h)

No discoloration

Shades

ROYAL BLUE
